### LOCAL MINING REVIEW

For the Week Ending June 28, 1873.

"Times are good," was the reply of one of our heaviest merchants to a dolefully disposed individual, who was inclined to harp upon the hackneyed subject of hard times, as it presented itself to his impecunious vision, and as it is of the scriptures appears to have resulted grade solely in their assumption of the motto, "I cannot work, to beg I am ashamed." Yes, times are good-not, perhaps, by comparison with the "flush" times, when every thing was selling at prices totally unwarranted by any legitimate business -when every thing was on a paper basis, and when men who were getting rich off speculations in the stocks of mines they knew nothing about, and to whom the fact of the existence or absence of ore in the mines they bought or sold was a matter of the most absolute indifference, so long as they could be manipulated on the Board, cared little what prices they paid for any thing; but if the realization of a handsome profit on each and every article that constitutes the enormous stocks that fill our ware houses-if the constant depletion of these stocks by cash customers or man of unimpaired credit, and if the spectacle of every avenue leading to Pioche lined with enormous teams laden with more goods, while every mail carries out more orders, and the cry is "still they come," if all this constitutes good times, then have we unimpeachable evidence that Commissioner of Deeds for California times are good. And such, indeed, is the fact. And why? We answer, because the MINES, that now and ever must form the basis of all this business, all this wealth, are being worked upon a vast and ever increasing scale, and demand the men and the merchandise, whose influx, called here by legitimate influences, causes the immense transactions to which we allude. Never has there been a time in our history when public confidence in the future of our mines were so thorough and complete, and we believe we hazard little in the prediction that even those whose only idea of the prosperity of a mining camp is based on heavy stock transactions in the San Francisco Board-on buoyant markets and tre-

> ness, but the ductability of the ores of NEWARK.

that district.

awaiting the arrival of machinery for

its reduction, while the Mendha Mill in

Highland is proving, not only the rich.

Pioche, are prone to phrase it-"outside

We visited this mine yesterday, anxious to verify with our own eyes the re-ported rich strike. We saw on the dump ore that we are willing to stake our judgment as a miner of 20 years standing, was as rich, if not the richest ore ever found in this district; but in the absence of the Superintendent we could get no details as to the extent of the deposit. In next week's Review we shall endeavor to obtain authentic intelligence in regard to a development of so much importance

Work is being rapidly prosecuted on the lower drift from the main shaft, which the lower drift from the main shaft, which is now in about 250 feet. It is expected the ledge will be struck at about the distance of 280 feet. From the stopes and drifts on the 164 foot level the same quality of ore is being extracted. About two tons of first-class ore is being raised delivered. daily.

In this mine we have no material change to note. The ore throughout the mine is fully equal in quality and quantity to the developments of the past few weeks. It is rapidly establishing itself in the opinion of the mining public as a mine that will do to stay by

pleted. An immeuse amount of new machinery for this mine is now en route from Palisade to this place. An article from the Eureka Sentinel of the 26th inst. notices the passage through that place of sixteen of Pritchard's large freight wagons so loaded, the two days preceding, and we learn that that is not all.

SOUTH SIDE.

SOUTH SIDE.

This location—a home incorporation—
is situated just above the crest of the
mountain, some 450 feet beyond the
water tank. The shaft was started in
hard blue limestone, and has now attained a depth of 100 feet. At about 75
feet the character of the limestone
changed, and is heavily stained with
mineral. This location was made on the
hypothesis that the shafts on Panaca
Flat were all sunk in the wrong direction
to catch the great vein of the camp, and to catch the great vein of the camp, and it is not impossible the views of its locators may prove correct.

AMERICAN PLAG. Sinking the main shaft, and crowding the work with all possible dispatch. Shipping ore constantly to the mill, which is running on full time. The mill of this Company is the mill originally built and owned by what was known as the Chicago Company, in Hamilton, White Pine county. The same Company brought it here, and erected it in the vicinity of Bullionville, we believe in

the American Flag Mine, and the mill has ever since gone by that name. It has fifteen stamps. A Steteveldt Furnace has since been added, of a capacity of twenty tons daily. It is now, beyond doubt, one of the most perfect and complete in all its appliances, of the quartz mills, not only of Ezy District, but of the coast, as judged by that best of criterions—the work it performs. Sixteen tons of ore, crushed this week, worked up to 86 per cent.

PACIFIC TUNNEL. A contract for 100 feet has just been completed, making the extreme length of the funnel 1,263 feet. A new contract for from 100 to 200 feet will be let to-morrow. Indications of the close proximity of a main ledge are unmistakable. For some distance past, bunches of ore have been cut in the tunnel, some of which assayed very high.

HAVANA. Shaft 320 feet deep; vein nine feet wide; all ore. About 10 inches from the foot wall is a streak of ore 30 inches thick and of extraordinary richness.

EXCELSIOR. Still drifting from the new shaft, at a depth of 180 feet, to make the connection with the old workings. As soon as this is accomplished, ore will again begin to come to the surface, and from what we come to the surface, and from what we can learn, of such a character, and in such quantities, as will astonish the unbelievers in the richness and perma-nency of the mines "over the divide."

LA PAZ. to his impecunious vision, and as it is wont to do to that rather too numerous class of our fellow citizens, whose reading average width. The ores are of a high

> VULTURE. The main shaft is down 80 feet. The whole shaft is now quartz, in which occur frequent bunches of ore of a very high grade. The general prospect for soon striking a body of solid ore is extremely encouraging. Sinking is progressing rapidly. SPRING MOUNTAIN TUNNEL

Still sinking in the tunnel on Ledge No. 3, and making fair progress, with good indications of soon reaching a change of formation. The ledge is steadily improving in size and quality of ore, as depth is obtained. ALADDIN.

Now down 134 feet, and still sinking. There is no change to note at this time. The prospects for the future continue

THE WASHINGTON AND CREOLE MINE. THE WASHINGTON AND CRECLE MINE.

Shipped last Monday, \$6,956 97, and will ship the coming week about \$7,500. The bullion product for the last three weeks has been steadily increasing, and from present indications the percentage of increase seems likely to continue. Superintendent Tarpey showed us the results of two bars melted and assayed by T. R. Butler, yesterday, yielding respectively 1,300 and 1,399 ounces, of which \$448.10 was gold—a percentage of over 12½ of gold in the bullion product.

BOWERY A great change for the better is notice-able in this old and favorite mine. Everywhere throughout the stopes an improvement is visible. There are now about 50 tons of magnificent ore on the dump, equal if not superior to the rich orus that made the name of the Bowery famous in the past history of Ely Dis-trict. Expect to commence crushing again on the 1st proximo, or as shortly thereafter as the mill can work for them. PIOCHE. mendous financial conflicts between the

Working the usual number of hands Bulls and Bears-even these have but a and raising about five tons of ore per day. Expect to resume crushing on or about the 1st of July. little while to wait. From every adjacent-or as we old residents, 49ers of

CRIEF OF THE HILL.

Stife engine, with all the modern appliances and improvements that can make the works a success, has been heard from en route, and may be expected to arrive about the 2d proximo. It was shipped from San Francisco on the 21st inst., and Lawler, Pritchard's agent here, says he will bring it through in five days from Palisades. The incline is being put in thorough order by cutting down in places and straightening, and is being solidly-timbered—preparatory to permanent and extensive work. Pending these changes, however, the raising of ore, is, for the time being, necessarily suspended. time being, necessarily suspended.

OBIGINAL DEXTER. Drifting both ways from bottom of incline. Plenty of good ore in sight.

MEADOW VALLEY PEACOCK.

We saw some very fine looking ore from this mine, and hear the ledge has been struck in the lower level, but could not find out anything definite. MAZEPPA.

The hoisting works having been com pleted, steam was raised on Monday the 23d, and sinking the main shaft resumed. weeks. It is rapidly establishing itself in the opinion of the mining public as a mine that will do to stay by.

RAYMOND AND ELY.

Underground work has been suspended for the time being, until the extensive surface repairs and alterations in contemplation and under way are completed. An immeuse amount of new machinery for this mine is now en route thing about the premises is first-class, and machinery works finely. Sinking the main shaft will be vigorously prosecuted and in a few weeks we may expect the Mazeppa to materially increase the bullion shipments from Pioche.

Bristol District.

Work during the week has been prin-ipally of a nature preparatory to opera-lons on a larger scale than heretofore.

SULTAN. The ledge has widened in sinking dur-ing the past week, and is now fully ten feet wide, showing throughout its width ore of fully as good an average quality as praviously.

This mine has been opened by two shafts—the upper one 60 feet, and the lower one about 145 feet deep. The ores from this mine are richer than those from the Arizona and Regent mines, and more closely resemble some of the better qualities of the rich milling ores of this district.

last Thursday turned out one handsome bar of bullion, and day before yesterday another—the value of the two bars being another—the value of the two bars being something over \$2,000. The scarcity of quicksilver in the market just at present, prevents the mill from doing itself full justice. It is worthy of remark that the ores of Highland district carry a much greater percentage of gold to the ton than those of Ely—about 10 per cent of the precious metals contained in them

Righland District.

Main shaft down 52 feet, the ledge dipping at an angle of from 80 to 85 degrees—showing a width of ore aver-aging about two feet, of an improved quality.

Tunnel in 90 feet; ledge two feet wide, and steadily increasing in size. THE SEVEN-THIRTY.

Evidently the men who made this old ocation had bonds "on the brain." It is now being newly opened, and is look-ing extremely well.

ARTZONA AND DEGENT MINES These mines are locations on the same ledge, both the property of the Mendha Mill and Mining Company. For 200 feet they show a body of ore nowhereless than six feet in width, of argentiferons carbonate of lead.

#### Hypienic Rules.

The fact that cholers, one of the most estructive of all epidemics, has made its appearance in different cities of the United States, affording a possibility of its reaching Pioche in its travels westward, impels us again to call attention to the many disease-breeding nuisances which prevail in many parts of the city, and which the promptings of a proper regard for the health of the inhabitants should cause to be removed at once. Abundant evidence has been afforded in the past that the horrors of the disease may be materially mitigated and possibly its outbreak prevented entirely by timely attention to cleanliness and the observance of suitable hygienic rules. The Board of Health in Sacramento has taken hold of this matter in earnest by directing the Health Officer of that city to visit and examine every street and alley within the thickly populated porconnection between the new shaft tion of the city, to inspect the cellars, The connection between the new shaft and the old works, perfected some two weeks ago at a depth of 200 feet, having ventilated the mine thoroughly, work is now progressing rapidly and in good and workmanlike shape. Working 17 men, and will shortly be prepared to extract much larger amounts of ore from the stopes than ever before.

tion of the city, to inspect the cellars, yards, drains and cesspools, and to ascertain as far as practicable the existence and locality of all deposits of fifth, garbage or other offensive or decaying matter; also to see that all foul and offensive piaces, cellars, privies, yards, drains, and cesspools are thoroughly disfilth, garbage or other offensive or decaying matter; also to see that all foul and offensive places, cellars, privies, yards, drains, and cesspools are thoroughly disinfected and purified, following strictly the rules and measures furnished by the Board of Health, and it is made the duty of the Health Officer to require the woodwork of the basements, cellars and outhouses attached to premises occupied by the Chinese population to be properly whitewashed, in addition to enforcing the other means for disinfection. The rules for disinfecting prescribed in Sacramento might be used here in Pioche to great advantage, and we therefore ap-

ramento might be used here in Pioche to great advantage, and we therefore ap-pend the same, hoping that they may receive attention here: "1. Foul and of-fensive cellars and basements to be filled up or covered to a depth of at least six inches with dry sand or earth. 2. Water-closets, privies, cesspools and drains to be disifected with sulphate of iron. As be disitected with sulphate of iron. As a general rule to be observed half a pound of this salt, dissolved in two quarts of water, is to be used to disinfect each cu-bic foot of filth, and the same should be repeated, except in the cases of privies and water-closets, at least once in ten days. In the latter the daily addition, after thorough disinfection, as above, by each individual using the same, with twothirds of an ounce of solid copperas, or, for a water-closet, one-third of a pint of the solution above mentioned will be suf-

ficient to keep them inodorous. 3. Car-bolic acid may be used after disinfection by the iron, in a finid state, diluted with Bishop and Lek's old stand is full of choice drugs and chemicals—they buy correctly complete the raise from the districts," come words of confidence and cheer, and backed up by such extensive and well directed labor, as cannot fail to soon richly remunerate the owners of the problem. Problem News Deport, Main street—C. Wiederhold.

For the very best of dental work go to 1. C. Nichols, Dentist, Main street.

Go to Alexanders' for your drugs.

Figure 3. Pioche, are prone to phrase it—'outside districts," come words of confidence and chemicals—they buy such extensive and well directed labor, as cannot fail to soon richly remunerate the owners of the mines, and place the names of the several districts on that roll of honor, whose only criterion is success. Already immense quantities of ore have been raised to the surface in different localities, where the odor is not objectionable, chloride of lime will be found a useful deodorizer and disting and sinking is now going on night and day. Taking out ore all the time; 40 to the surface in different localities, where the odor is not objectionable, chloride of lime will be found a useful deodorizer and distincts on the time; 40 to the surface in different localities, where the odor is not objectionable, chloride of lime will be found a useful deodorizer and distincts on the time; 40 to the surface in different localities, where the odor is not objectionable, chloride of lime will and districts on the top of the raise, the drift onto to be used as a substitute for copeters.

The young man, somewhat abashed, answered: "Excuse me, please sit\_I aint posted up on custards."

THE RAYMOND & ELY-HERMES CASE-NEW TRIAL GRANTED .- At 4 o'clock yesterday afternoon Judge Fuller announced his decision in favor of granting a new No change to note. Shipped \$150,000 trial. A great number of people were present, a circumstance which evinced the deep feeling in reference to the matter. The opinion of the Court will be filed with the Clerk, after which a synopsis, if not the opinion in full, will be laid before our readers. The time of commencing the new trial and motion for change of venue (should any be made) will be given at some future time Sprinkling the Streets.—Owing to

the great amount of water used in sprinkling the streets by means of the hose it has been thought best to substitute water-carts as a means of combating the dust. W. H. McKillip is willing to run water-carts and "down with the dust" daily for \$175 a week. So far, after canvassing the town, he has not been able to raise subscriptions enough.

ATTENTION, HOORS!-The members of the Lightner Hook and Ladder Company are requested to meet at the Court-house on Monday next at 8 o'clock p. m., for the purpose of making the proper arrangements for celebrating the anniversary of our nation's independence.

W. W. Bishop, President.

E. SCHOPPMANN, Secretary.

VACATION.-We are informed by Mr. Coleman, one of the School Trustee that owing to the extreme warm weather there will be no school in Pioche School
District during the month of July. This
is not a bad idea, and will prove beneficial to the scholars, who will come back
at the expiration of the vacation refreshed.

WHEN Sunday comes, every thoughtful man desires to learn how to pass the leisure time both profitably and pleasantly; and all such call at Wiederhold's, where they are sure to obtain a supply of reading matter—newspapers, pictori-als and periodicals.

ALLEN M. FINDLAY, a native of Sent As we learn from Mr. Riotte, is run-ning on ores from the Arisona mine, and Court yesterday.

SHOOTING AFFAIR-NO SERIOUS RE-SULTS. - About sundown last evening a difficulty occurred on Main street in front of Wiederhold's news depot, between John P. Kelly, an attorney-atlaw, and J. J. Nagle, a mining Superintendent, which would probably have been a serious affair but for the timely interference of Sheriff Travis, Deputy Sheriff James and a bystander, who sherill sames and a bystander, who interfered just in time to prevent blood-shed. It seems that Kelly and Nagle had previously had some high words, growing out of Judge Fuller's decision granting a new trial in the Raymond & Ely-Hermes case, but separated and met again at the time and place before mentioned. High words ensued, and just before the shooting something was said at which there were simultaneous bostile demonstrations by both parties and demonstrations by both parties and at which there were simultaneous hostile demonstrations by both parties, and Kelly was seen to draw a pistol. Sheriff Travis caught his arm, and the contents of the pistol were discharged into the air. Deputy James and a bystander took hold of Nagle, and so the parties were separated. Mr. Kelly was taken into custody, and at once gave bonds for his appearance before Justice Stoutenburgh on Monday morning.

PALACE CLUB ROOMS. - Yesterday Russ. Scott spread before his patrons, for the first time, a superior lunch. Those who partook of it thought they were transported for the time to the Bank Exchange or Barry & Patten's, in San Francisco. Hereafter lunch will be served in this saloon. Go and try it for yourself

PERSONAL.-We notice the arrival in Salt Lake, en route for New York, of M'ile Josephine, the celebrated jig dancer, and her husband. She goes to New York to fill an engagement as premiere danseuse at the Theatre Comiquie, in August next. ATTENTION.—The different committees

having the arrangement of the celebra tion of the Fourth of July in hand, will meet at Russ. Scott's club rooms at 8 o'clock p. m., sharp, this (Sunday) even ing. By order of the President, P. Hol-land.

SERVICES AT THE EPISCOPAL CHURCH. Morning service at eleven o'clock; Sun-dayschool at 2 p. m., infant baptism at 8 p. m., and evening at eight. Henry L. Badger, Rector.

Going.-Frank Tagliabue leaves this morning via Hamilton for San Francisco. He will be absent some weeks. THE FESTIVAL given at Brown's Hall

on Friday evening, for the benefit of Rev. J. P. Egbert, yielded about \$300. R. M. KEYES, representative of the house of Walker & Bros., Salt Lake, leaves that city to-day for Pioche.

THE HOTTEST .- Yesterday was proba-

bly the hottest day of the season—at 4 o'clock p. m., the mercury rose to 89. RALPH KETCHUM was the only passen ger telegraphed from Polisade on the
